

Raysun ATF Dexron II

Automatic Transmission Fluid

Raysun ATF Dexron II is an automatic transmission fluid for automatic transmissions in older vehicles specifying use of DEXRON® II D quality fluids. The high quality base oils and special additive system used in this oil provide resistance to oxidation, better frictional properties, good low temperature fluidity, improved seal compatibility & wear protection. It exceeds the performance requirements of General Motors DEXRON® II D specification and provides excellent driving experience in a variety of driving conditions.

Advantages

- Good thermo-oxidative stability minimizes formation of lacquer, sludge & deposits and keeps transmission clean
- Controlled frictional characteristics helps in consistent and smooth shifts in a variety of driving conditions
- Improved antiwear technology protects critical transmission parts against wear
- Extremely high Viscosity index ensures adequate lubrication in both high operating & low starting temperatures
- Better foam control leads to smooth & lasting shift feel and reduces fluid loss
- Enhanced Low temperature fluidity assist in good cold start performance
- Provides better protection against rust and corrosion
- Compatibility with all common seal materials

Applications

- Recommended for all vehicles of General Motors requiring DEXRON®-II D quality fluids
- Also recommended for power steering units, certain manual transmissions and hydraulic systems where such type of fluids is required

Specifications

- General Motors DEXRON® IID

Raysun ATF Dexron II

Typical Values	ASTM Method	Specification
7.2	D 445	Viscosity @ 100 °C, cSt.
162	D 2270	Viscosity Index
172	D 92	Flash Point, °C
-45	D 97	Pour Point, °C
12000	D 2983	Brookfield Viscosity, @-40 °C, cP

Note: "All of the results are typical and the results of each batch are presented in the COA sheet."
